

SHIVAM OMER

SDE | Backend Developer | DevOps Engineer

📞 +91-8303669396 @ shivamrajomar@gmail.com 🔗 <https://www.linkedin.com/in/programmer-shivam/> 📍 Delhi, India

SUMMARY

Backend Engineer with 2+ years of experience designing scalable microservices, asynchronous processing pipelines, and cloud-native backend systems across startup environments. Skilled in Python, Django, Kafka, Docker, Kubernetes, and distributed architectures with hands-on exposure to high-throughput event processing, infrastructure automation, and real-time data workflows.

Built backend platforms handling thousands of asynchronous events, optimized execution runtimes by up to 4x, and streamlined deployment operations through containerized and infrastructure-as-code practices. Experienced in developing resilient APIs, ingestion pipelines, and system orchestration solutions across AWS, Azure, and Linux ecosystems.

EXPERIENCE

Software Developer Engineer

Move37AI 📅 01/2026 - Present 📍 Delhi, India

- Developed event-driven backend services using Python, Django, Kafka, and MongoDB to process high-volume asynchronous workflows and real-time notifications.
- Designed RESTful microservices for import-export and accounts receivable platforms, improving transaction orchestration and backend scalability across internal systems.
- Implemented Kafka-based producer-consumer pipelines handling thousands of distributed events with resilient retry handling and asynchronous processing patterns.
- Containerized backend applications with Docker and streamlined Linux-based deployment workflows across development and cloud environments.
- Collaborated on AI-assisted engineering workflows using Cursor, GitHub Copilot, and automation tooling to accelerate development cycles and reduce implementation overhead.

Backend Developer

Solytics Partners 📅 03/2024 - 12/2025 📍 Pune, India

- Engineered WarpDrive, a Python-based execution framework that reduced task execution latency by nearly 80% across distributed notebook workflows.
- Re-architected asynchronous execution services using Django and Golang, accelerating processing throughput by 4x for large-scale analytical workloads.
- Automated CI/CD pipelines with Jenkins, Groovy, Docker, and Kubernetes, decreasing manual deployment effort by over 90% across staging and production clusters.
- Provisioned and maintained cloud-native infrastructure using Terraform, Helm, and AWS services, improving deployment consistency and operational reliability.
- Built scalable backend APIs and orchestration layers supporting concurrent execution pipelines, microservice coordination, and fault-tolerant processing.

EDUCATION

Bachelor of Technology (CSE)

Dr. A.P.J. Abdul Kalam Technical University

📅 08/2019 - 06/2023 📍 Kanpur, India

PROJECTS

Azure Databricks Delta Lake Pipeline

🔗 <https://github.com/shane-Coder/azure-databricks-delta-lake-pipeline.git>

[Azure Databricks, PySpark, Delta Lake]
Implemented a cloud-native data ingestion pipeline leveraging Delta Lake and micro-batch processing to streamline large-scale log transformation and analytical workloads.

Log Management Microservice

🔗 <https://github.com/shane-Coder/log-management-microservice.git>

[Django, Kafka, MongoDB, Docker]
Designed a distributed log ingestion platform capable of processing thousands of asynchronous log events with real-time alerting, analytics pipelines, and scalable Kafka-based streaming architecture.

Event-Driven Notification System

🔗 <https://github.com/shane-Coder/event-driven-notification-system.git>

[Django, Kafka, MongoDB, Docker]
Built an event-driven notification engine supporting asynchronous email and SMS workflows through decoupled producer-consumer microservices and resilient message queue orchestration.

KEY ACHIEVEMENTS

LeetCode

Solved 700+ algorithmic problems in Easy, Medium, and Hard levels

GeeksForGeeks

Solved 350+ data structures and algorithms problems

SKILLS

Cloud & Data

AWS, Azure, Ansible, Terraform, ELK, Jenkins, Docker, CI/CD

Languages

Python, Golang, C/C++, Java, Django, FastAPI, Microservices, MongoDB, MySQL, PostgreSQL, System Design

Tools

Linux, Postman, Git, Shell, Bash, PyTest, Kafka
